

Task 1 : Create a cronjob that runs every day at 8:00 AM and appends the current date and time to a file named mylog.txt in your home directory.

Ans :-

Cron entry:

```
0 8 * * * date >> ~/mylog.txt
```

Explanation

- 0 = Minute 0
- 8 = 8 AM
- * * * = Every day, every month, every weekday
- date = Displays the current date and time
- >> = Appends the output to mylog.txt

Task 2 :- Set up a cronjob to back up a folder named 'music' from your Downloads directory to a 'backup_music' folder inside your Documents every Sunday at 11:30

PM.
Hint: Use the **cp -r** command in your cronjob.

Ans :-

First, create the destination folder:

```
mkdir -p ~/Documents/backup_music
```

Cron entry:

```
30 23 * * 0 cp -r ~/Downloads/music ~/Documents/backup_music/
```

Explanation

- 30 = Minute 30
- 23 = 11 PM
- * * = Every day and month
- 0 = Sunday
- cp -r = Copies the folder recursively

Task 3 : Write a cronjob that deletes all .tmp files from your Desktop every hour and logs the deleted filenames to a file called deleted_tmp.log.

Ans :-

Cron entry:

```
0 * * * * find ~/Desktop -type f -name "*.tmp" -print -delete >> ~/deleted_tmp.log
```

Explanation

- 0 = At the beginning of every hour
- find = Searches for .tmp files
- -print = Logs filenames
- -delete = Removes the files
- >> = Appends filenames to deleted_tmp.log

**Task 4 : Temporarily disable a cronjob that prints 'Time for a break!' every 2 hours, without deleting the job. Then, re-enable it after 5 minutes.

Hint: Use the comment (#) character to disable and enable lines in your crontab.**

Ans :-

Original cronjob:

```
0 */2 * * * echo "Time for a break!" >> ~/break.txt
```

Disable it

Add # at the beginning:

```
#0 */2 * * * echo "Time for a break!" >> ~/break.txt
```

Save and exit.

After 5 minutes

Open crontab again:

```
crontab -e
```

Remove the #:

```
0 */2 * * * echo "Time for a break!" >> ~/break.txt
```

Save and exit.

Task 5 : Use ChatGPT or another AI tool to generate a cron expression for running a script every weekday at 7:45 PM, then test it by creating a cronjob that echoes 'Dinner Reminder' into dinner.txt at the scheduled time.

Ans :-

Cron expression:

```
45 19 * * 1-5 echo "Dinner Reminder" >> ~/dinner.txt
```

Explanation

- 45 = Minute 45
- 19 = 7 PM (19:00)
- 1-5 = Monday through Friday

View Installed Cron Jobs

```
crontab -l
```

Check Cron Service Status

```
sudo systemctl status crond
```

Start and enable it if needed:

```
sudo systemctl enable --now crond
```
